

# Message Vault 3.2.08

Voicemail Archiving for Cisco® Unity Connection®

## EASY, FLEXIBLE VOICEMAIL ARCHIVING & RECORDS MANAGEMENT

Secure, accountable policy-driven record management of voicemail, along with the ability to search, filter, restore, redact and report on those messages.

**Meet Message Vault. Policy-driven retention that solves compliance & litigation needs right now.**

Message Vault makes it easy to ensure that voicemail records are retained according to policy with appropriate access controls and audit trails. Its intuitive interface makes it easy for designated personnel to quickly access and produce the records they need.

Message Vault is used by organizations around the world to support a variety of needs, from litigation support to compliance with communications retention regulations. Best of all, our unique architecture proves the unparalleled data integrity and retention policy compliance.

# Message Vault 3.2.08

Voicemail Archiving for Cisco® Unity Connection

## Compliance & Records Management:

### For End-User Productivity:

- Archives messages immediately, regardless of end user action.
- Messages easily searchable for preview, download, restoration & reporting.
- Option: End-user self-service for searching & restoring their own messages.
- Easy, secure message redaction.
- Easy management & support: graphical storage management, single click support logs & database optimization.

### For Management Oversight:

- Policy driven message retention, litigation holds & destruction.
- Compliance roles for security, accountability & auditing.
- Auto-check ensures all messages archived, even after a system outage.
- File Shredding (DoD level) of records upon retirement.

### For Administrator Needs:

- Streamlined administration using Cisco Class of Service settings to manage retention groups & policies.
- Available API for expanded integration options.
- Support for Unity Connection Clustering & Failover.
- Support for Multiple storage locations.
- Supports Microsoft Active Directory integration.

Available either  
on-premise or cloud.
