StoneScribe 3.2.5

Jabber Instant Message Archiving for

Cisco® IM & Presence

DONOMA

SEAMLESS MESSAGE MANAGEMENT, COMPLIANCE & ARCHIVING

Instant messaging is now part of the organizational communication toolset. Great for productivity, but this adds a new stream of communications that must be retained, secured and managed. It can seem a real challenge to satisfy the expanding retention and compliance requirements for organizations in the Financial Services and Insurance markets.

Meet StoneScribe.

StoneScribe makes it easy to ensure that Cisco Jabber instant message records are retained according to policy with appropriate access controls and accountability. Its intuitive interface streamlines data production for regulatory audits, examinations and e-discovery events.

Donoma archiving solutions are used by organizations around the world to ensure that Cisco communication records are retained securely with oversight and accountability Best of all, our unique architecture proves the unparalleled data integrity and retention policy compliance.
