

CENTRALIZED ARCHIVING FOR ALL YOUR COMMUNICATIONS

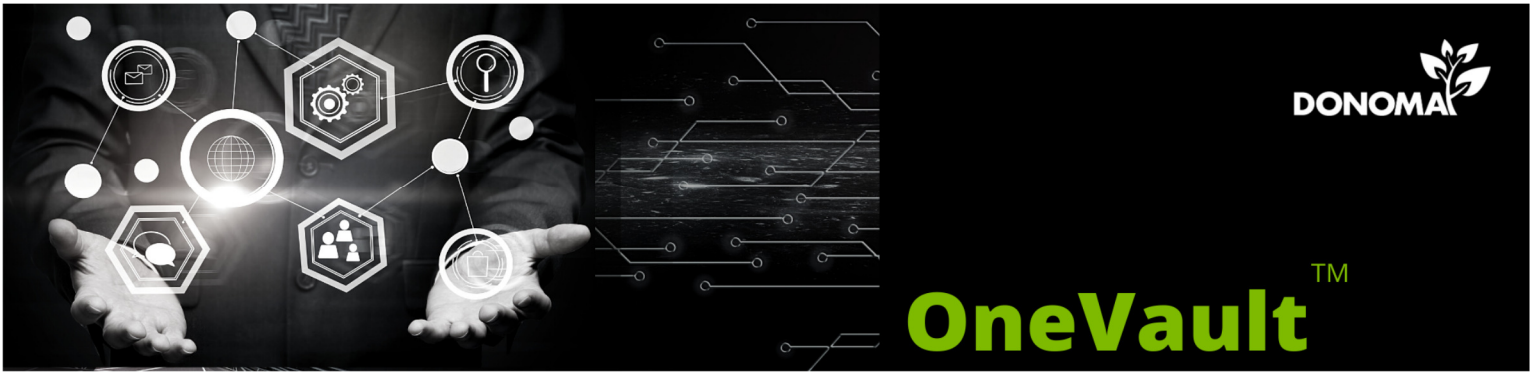

OneVault delivers secure centralized multi-data archiving built for the enterprise but scalable to make archiving easy and affordable. Perfect for today's growing remote work environments that are seeing explosive growth in the use of email, chat, team collaboration and voicemail. Archiving these communications has become essential for:

- compliance with industry and privacy regulations,
- support of eDiscovery efforts for legal and other investigations,
- retention of communications for corporate governance and other mandates.

OneVault is your solution for secure, effective retention built for today's agile environment.

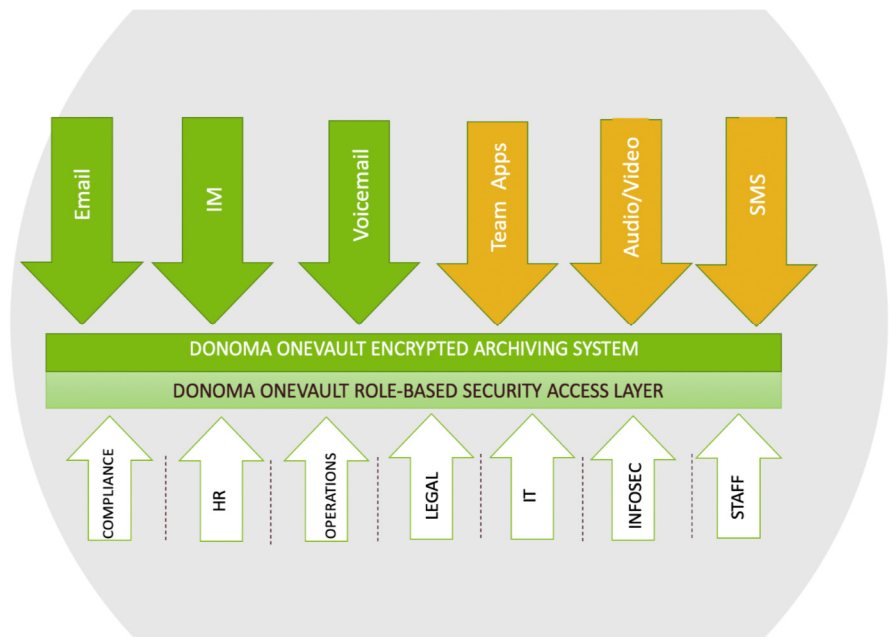

BALANCE USABILITY WITH SECURITY & ACCOUNTABILITY

With OneVault, all data is automatically retained, organized and decommissioned according to customized retention policies. Metadata, workflows and chain of custody detail powers behind an intuitive user experience.

Now it is easy for designated personnel to find records needed. Whether for reference, e-Discovery or other needs; data is easy to locate and produce. Legal, Compliance and Operations are reassured of consistent policy application. IT enjoys more streamlined server and storage usage.

- Meet regulatory compliance requirements (FINRA, SEC, HIPAA, FOIA, SOX, etc.)
- Easily manage litigation holds & multiple retention policies.
- Manage privacy regulation response (CCPA & GDPR, etc.)
- e-Discovery is easy, across all data.
- Reduces IT costs.
- Reduces e-Discovery costs.
- Role-based security.
- "Chain of custody" audit trails.
