## EMAIL ARCHIVING RECORD PRODUCTION

OneVault data is securely retained in a tamper-proof archive with role based access. Those with designated rights can easily run discovery searches with results in seconds.

OneVault streamlines production of e-Discovery into organized, easy to use data sets. Perfect for FOIA, compliance, litigation & more.

*"Archiving has traditionally been used to respond to e-discovery requests and regulatory audits. But it is also a great way to preserve institutional knowledge, recognize issues and see opportunities faster"*

Michael Osterman, Osterman Research

Easily organize, review and work with e-Discovery searches within your OneVault Workspace.

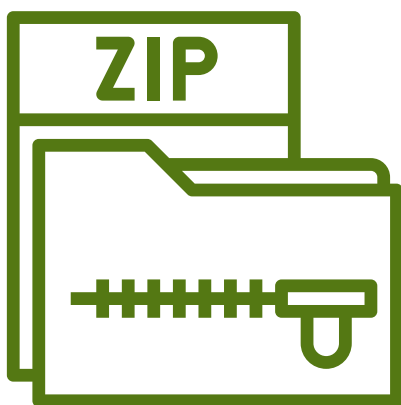

Record production can be exported or emailed (based on settings)

Continued sorting on produced record is available through .csv report.

### ZIP DRIVE EMAIL OR EXPORT CONTAINS :

#### CSV REPORT OF SEARCH RESULTS

Allows for additional search result refinement.

Report Includes: From, To, Date, Message Type, ID, & File Name.

#### ATTACHMENTS

Attachments included.

#### MESSAGES

Each email message included (EML format)

**NEED TO ARCHIVE OTHER COMMUNICATION APPLICATIONS?  
UPGRADE TO ONEVAULT MULTI-DATA VERSION TO CENTRALIZE &  
STREAMLINE RETENTION POLICIES, DATA SECURITY & E-DISCOVERY.**
